DETAILED ACTION

Response to Arguments

1. Applicant's arguments, filed 9/29/2005, with respect to claims 1-42 have been fully considered and are persuasive. The rejection of claims 1-42 has been withdrawn.

Allowable Subject Matter

2. Claims 1-43 are allowed.

3. With regards to claim 43, the cited prior art fails to disclose either individually or in combination, A system for identifying errors in a video conference conducted on a packet-based network, comprising: means for distributing a capture agent over a network from a central agent at a central device to a remote device in response to the request, the remote device associated with a collision domain that contains one of the two or more endpoints and operable to execute the capture agent.

The cited prior art also fails to disclose a means for collecting a plurality of media packets associated with the video conference in a capture file until a timer expires, the capture file located in a storage medium interfaced with the remote device and a means for communicating the capture file from the remote device to the central device when the timer expires.
